SELECTION AND DEMOLITION CLAMP

- Compact and simple design, easy servicing
- Available with 2 types of jaws: Demolition and Sorting
- Replaceable cutting edges made of HB 400 steel grant maximum durability
- Uses WELDOX high-tensile steel for the manufacturing of structural parts of demolition grapples

THE BEST SELECTION

Demolition grapples are conceived to perform small demolitions and to separate the resulting materials, waste...

Easy to use and versatile, the demolition grab for mini excavator is an increasingly popular tool, even on waste dumps and recycling sites.

FOCUS ON 2 version

SORTING

- ✓ Perforated arms.
- ✓ Bolt-on counterblades.

Suggested applications
precise sorting of materials.

DEMOLICION

- ✓ Arms with metal ribs.
- ✓ Bolt-on counterblades.

Suggested applications
Light demolition and sorting

SAFETY Question

All models have a double-acting hydraulic cylinder with a non-return valve.

The blades of the clamshells touch at the end of the closing phase, so as to allow a very precise and firm grip on the objects.

A sorting and demolition grapple is supplied as standard with a hydraulic rotator (no hydraulic pressure problems, no maintenance work, no adjustment of the excavator's hydraulic system).
